

FEED CART

FOR ONE DAY OLD CHICKS

- The feed cart ensures fast and even distribution of the feed on paper.
- Easy manual operation without the need for additional mechanization - significant time, labor and cost savings. Only one worker can easily manage feeding. Highly efficient feed distribution avoids waste.
- Immediate and easy access of chickens to feed. Reduces mortality, improves health, and contributes to rapid weight gain.
- Principle: The forward paper unwinds the loading paper on which the feed is fed from the hopper. Feeding is evenly distributed and the amount can be controlled.

Technical data

Hooper volume	0,31 m ³ / 200 kg
Max. paper roll diameter	350 mm
Max. paper roll width	700 mm
Cart weight without feed and paper roll	70 kg
Dimensions of the cart W x D x H	990mm x 935mm x 1475mm
